

Bhavya Shree G

**PURSUING BCA [CYBERSECURITY AND
CLOUD ARCHITECTURE]**

I am a detail-oriented and aspiring Web Developer with hands-on experience in JavaScript, and responsive UI development. I enjoy turning UI/UX designs into functional, user-friendly web applications and building scalable components. I have experience integrating RESTful APIs and collaborating in Agile environments to deliver efficient solutions. With a strong foundation in Java and Python, I focus on writing clean, maintainable, and optimized code. I am comfortable with debugging, performance improvement, and problem-solving in real-world projects. I am passionate about continuously learning modern web technologies and building impactful digital solutions.

TECHNICAL SUBJECTS

- Java, Java Script
- PHP
- Python
- C,C++
- API Integration
- CSS
- HTML

SKILLS

- Communication
- Problem Solving
- Coding
- Adaptability
- DEbugging
- Creativity
- Teamwork
- Problem Solving

Bhavya Shree G

PURSUING BCA [CYBERSECURITY AND CLOUD ARCHITECTURE]

BLACK-SHIELD

- Developed a Python-based file integrity checker using hashing (SHA-256)
- Designed real-time file monitoring with change detection and logging
- Added authentication and security features to protect system access

AGRO-ASSIST

- Built an agriculture app to help users with basic crop insights and recommendations
- Added features to take input, process data, and show results clearly
- Designed a simple and easy-to-use interface for better user experience

CHATBOT

- Built an AI chatbot + trip planner using Streamlit with real-time user interaction
- Integrated map, location search, and route planning with distance & ETA calculation
- Supported multiple travel modes (car, bike, walking) with a simple and interactive UI

NEWS SPOT

- Built a news web app using HTML, CSS, JavaScript with GNews API
- Added filtering, search, and dark mode features
- Used localStorage and async API calls for performance

HIGHLIGHTED PROJECTS

Quizr

- Developed a web-based application with responsive UI and core functional features
- Implemented efficient logic and API/data handling for smooth performance

IOBrain

- Developed a code for automatic traffic light.
- Presented a model of automatic traffic light.

Involve and Educate

- Been a volunteer in Educate to guide my juniors.
- Been an active participant and a volunteer in Involve.
